

Party-day checklist

Have this ready before the driver arrives

rentingabouncehouse.com

- 1 Clear a path from the truck to the setup spot. Gates open. Cars moved. Pets inside until setup is done.
- 2 Flat space big enough for the unit, plus a few feet around it. Grass is best. A driveway works if we can anchor to a vehicle.
- 3 Austin: outdoor outlet within about 100 feet, or a generator. Michigan: outdoor outlet within about 75 feet, or a generator.
- 4 Parks usually have no usable outlet. Book a generator. Confirm the park allows inflatables before we load the truck.
- 5 We usually arrive 30 minutes to 3 hours before your start. On a busy day it can be earlier. Someone 18 or older should be there.
- 6 The blower stays plugged in the whole rental. Unplugged means the bounce house deflates.
- 7 Austin weather: cancel for rain until the driver arrives. Prepaid amounts stay as credit with no expiration. No deposit. Once it is set up, the rental stands.
- 8 Michigan weather: cancel for any reason up to 24 hours before start. Rain: cancel until delivery. Once the unit is unloaded, there is no credit. A restocking fee can apply to refunds. Call to confirm the current rate.
- 9 Empty the unit before pickup. Shoes, toys, and cups out. We take it down.
