

Bounce house safety rules

One page for the adult in charge of the inflatable

rentingabouncehouse.com

- **One adult stays at the bounce house the whole time it is in use.**
At the entrance. Not in the kitchen. If you step away, another adult takes the spot first.
- **Little kids and big kids do not bounce together.**
Split the group. Little ones go first, then the bigger kids. They do not share the bounce at the same time.
- **Shoes stay off.**
Bare feet or socks only. No glasses, jewelry, sharp objects, or face paint inside.
- **No food, drinks, gum, or silly string.**
Silly string stains the vinyl for good. We cannot get it out. Keep snacks on the grass.
- **No flips unless the unit is built for them.**
Capacity is a real number. If it feels crowded, rotate groups.
- **Wind is the stop rule.**
Sustained wind around 15 mph or more: get everyone off, then turn the blower off. Do not leave it running in high wind.
- **Lightning nearby: everyone off, blower off.**
A little rain is usually fine if there is no thunder or lightning. You decide if the kids will still have fun.
