

Setup area diagram

What the driver needs: path, flat spot, and power

rentingabouncehouse.com

- Austin: outlet within about 100 feet. Michigan: about 75 feet. Farther than that, book a generator.
- Open the gate before we arrive. Pets inside. No sprinklers on the setup spot.
- Overhead: no low branches or power lines over the bounce house.
- On a driveway with no grass, we can anchor to a car. Tell us when you book.
